Special Varieties---Our Introduction

Description and Ratings by Chas. E. F. Gersdorff

MRS. J. C. GROSSMAN (K) ........ New Price $2.50 each, $25.00 per dozen
Introduced by us late in the spring of 1924 at $5.00 per bulb. Charles E. F. Gersdorff, in reporting his rating of this variety, says: "There are not many of this type to rate so high." Exhibition 91, Commercial 91. "It is surely one of the very best Prims on the market." His color description, according to Ridgway's Chart, is: "Grenadine red to lighter throat, bases of lower petals pale orange yellow blending to a midrib of cream color. Pistil cream color, anthers amethyst violet. It is one of the few real 'Selfs.'" The clear, bright color and straight, graceful spikes make it ideal for either florist or landscape work. Like most Prims, it is very productive of good, strong bulblets. This is one of Gersdorff's "Super Glads."

Seed sown May 1920, in August, 1921, fifteen months later, from one-half inch bulb grew a spike of sixteen buds, five open at once, four and one-half inches in diameter and a bulb three and one-half inches in diameter, with four strong eyes. Needs deep planting and plenty of room. This is sure to be a winner.
